Versatile Compact Drive

iMASTER C1

iMaster C1's compact size and sensorless vector control technology provide optimized performance for industrial equipment.

Product Range

- 3Phase 220V 5.5kW ~ 15kW
- 3Phase 440V 5.5kW ~ 22kW

Excellent Applicability

- KEB Function
- External Brake Control (for Lift, Hoist)
- Automatic current suppression function (minimization of inverter stop)
- Adoption of optimal algorithm to minimize the motor loss

High Performance

- V/F, User V/F, Enhanced Sensorless Vector control
- Dual Rating (Heavy Duty & Normal Duty)
- High Torque at low speed (150% @ 1 Hz)
- Built-in EMC Filter (Optional)

Easy, Simple, User friendly Options

- Removable Keypad
- Side by Side Installation
- Built-in Fieldbus communication (Optional)
- Easy Installation & Simple Operation

■ External Brake Control Function (for Lift)

When using external brakes, such as the lift system, it provides safe and elaborated control for all variables, and the operation speed can be changed depending on the load.

Operation Sequence

Application

User V/F

User can randomly set the required V/F ratio according to the motor. User can use following parameters to obtain a suitable V/F pattern for a special motor.

KEB (Kinetic Energy Buffering) function

The KEB function maintains the DC voltage by control the inverter speed during the power failure period, thereby helping maintain the interval between the instantaneous outage and the low voltage trip for a longer time.

The KEB Feature helps to keep user's facilities safe from any power failure situation.
